CORE PROFILE

Specialist in process digitalization and educational/RH digital solutions, combining Full Stack development, data analysis, and intelligent systems. Experience in platform design, process automation, AI-based evaluation, and competency management systems.

PROFESSIONAL EXPERIENCE

Prefecture of Oujda-Angad — Observation Internship (1 month, 2022)

- Analysis of administrative processes and information flows in a public environment.
- Understanding digitalization challenges in public services (traceability, efficiency, accessibility).

CHU Oujda — Final Year Internship (2 months, 2023)

Système de pointage avec technologie RFID

- Analysis of a manual attendance management process and proposal of an automated digital solution.
- Contribution to internal process optimization through technology.
- Design of a system improving data reliability and traceability.

CHU Oujda – Final Year Internship (3 months, 2024)

Brain Tumor Classification Using an Intelligent System

- Design of an intelligent system to support medical image analysis and data structuring for machine learning.
- Interdisciplinary collaboration with healthcare professionals to validate system usage.
- Work on integrating AI tools into human-centered and decision-making environments.

FORMATION

Master – Digital Transformation of Educational Processes & Competency Engineering (TNPEIC) - ESET Mohammedia, 2024 – Present

Professional Bachelor's Degree – Business Intelligence (Decision Support IT) - EST Oujda, 2024

DUT – Embedded Computer Engineering - EST Oujda, 2023

PROJECTS

COFOEM — HR & Competency Platform (2025) — Designer & Developer

Digitalization of HR processes (training, recruitment, skills management) to structure data and support decision-making.

Stack : React, Node.js, MongoDB, TypeScript.

EduQuiz— AI-powered Quiz Application (EdTech, 2025) — Digital Solution Designer / Technical Lead

Automatic quiz generation, role management, and subscription handling for learner assessment.

Stack : JavaFX, MongoDB, OpenAI API.

Social Network Web Application (2024)— Full Stack Developer

Design and development of a complete web application for content publishing, user interaction, and profile management.

Objective: Mastery of modern web architectures and user interfaces.

Stack : React, Node.js, Express, MongoDB.

TECHNICAL SKILLS

- **Process Digitalization & Engineering:** Process analysis, UML modeling, workflow automation, digital solution design, LMS platforms (Moodle), change management, digital transformation support.
- **Full Stack Development** HTML, CSS, JavaScript, TypeScript, React, Next.js, Node.js, Express, PHP, Java, Python.
- **Databases & Architecture:** MySQL, PostgreSQL, MongoDB, conception de schémas, API REST.
- **Data & AI:** SQL, Excel avancé, Power BI, Machine Learning (classification), intégration IA (OpenAI API).
- **Project Management & Tools:** Agile/Scrum, Kanban, Git, GitHub, Docker, Jira, MS Project, Teams.
